# Explanation of Design Choice

- In terms of design, I wanted it to keep it minimal without extra components(i.e. ads and external links) on the page so that shoppers can easily finish the shopping process without getting distracted
- I made sure to incorporate the following elements:
  - checkout button that is noticeable in order to lead customers to the checkout
  - transparency on the shipping costs
  - the ability to change the quantity of the number of rolls
- Important to place checkout option on the right because users naturally read from left to right

# Explanation of Design Choice

- Laid the summary against a grey background to contrast with the product in the cart
- Made the words “Shopping Cart”, “Summary”, and “Total” bold because those are the most important takeaways from this page
- Checkout button is in blue which stands out from the white/grey color scheme of the shopping cart
